SCAMPER Strategy

S Substitute	C Combine	A Adapt	M Modify	P Paraphrase	E Eliminate	R Rearrange
Substituted the textbook for computers and the Internet.	Combined chapters in the book into one lesson that involved the Internet.	Adapted the lesson to include research from the Internet as well as other sources such as encyclopedias, the textbook, and other books.	Modified my lesson from individual work to working in cooperative groups that had individual elements.	There was no need to paraphrase anything.	Eliminated the exclusively individual assignments that are a normal part of reading to learn.	Rearrangement that was done was to my classroom. I changed from traditional rows to clusters to accommodate the cooperative groups.
